 These instructions are important and should be carefully read and followed.

### **CONDENSED INSTRUCTIONS FOR ORDERING EXTRAS.**

Be sure and place your orders for extras as early each season as you possibly can. Place them either with our authorized agent in your territory, or direct with us.

Order all parts by letter, if possible, giving number of part and complete description. If in the middle of the season, order by telegram, instead of telephone. We assume responsibility for shipping you what you order by letter or telegram, but not by phone.

---

## **FULL INSTRUCTIONS FOR ORDERING EXTRAS.**

Try and order what extras and repairs you will need to put your harvester in shape for the season's work as long as possible before you intend to use the machine. This will save delay in your receiving them, because just at the start of the season we have many more orders than yours to fill, and delays are unavoidable.

You will get your extras sooner after ordering if you place your orders with our authorized agent for your territory. He aims to carry a full stock of parts, and the extra time necessary to have them come from the factory will be saved to you by ordering direct from him.

If it is impossible to do this, place your order with us direct, either by letter or telegram. We will assume full responsibility for correct filling of all orders when placed in this way, but we CANNOT be responsible for mistakes made in filling orders placed over the telephone. If mistakes are made in shipment of extra parts on telephone orders, the purchaser will be charged with any additional expense in the way of transportation charges to or from the factory.

We have tried to arrange this book so that the parts for your particular machine will all be found together.

When ordering castings, be sure and give us the number which you will find on your old part. After finding this number, turn to the first list in the book if the casting is for a part of your harvester, and to the next two lists if it is for your engine, and see whether the number which you have corresponds with the description of the part to be replaced. Wherever possible, give us the number of the part, and also the description as printed in the price list.

When ordering, give us, in addition to your postoffice address, your shipping point, County and State, and designate whether the goods are to be shipped by express, freight or parcel post.

When ordering by freight, remember that the railroads have certain days on which they make less-than-carload shipments to your town, so that there may be some delay in getting the parts.

All express and freight shipments will be sent charges collect unless your receiving point has no freight or express agent, in which case we will pay the charges and add them to your bill.

On all shipments made by parcel post, the postage will be added to your charge.

We do not insure shipments unless requested. As they are all made at the purchaser's risk, it is wise to ask us to insure parcel post shipments, but when you do so, you must expect to pay the insurance charges.

When ordering parts, try and give us the size of your machine, as well as the number and name of the part. Only our castings have numbers, so, when ordering parts for Drapers, Straw Carriers, Grain Carriers, Jackson Feeders, Jackson Feeder Sticks, Separator Shoes and Screens, Cleaner Screens and Shafting, be sure to give us measurements and full descriptions.

In each shipment of repairs, we include a list showing what is packed in it. As soon as your shipment is received, compare this list with the goods, and in case of shortage or breakage, make claim to us within FIVE DAYS. Unless this is done, it cannot be allowed.

No repair parts will be furnished free by us unless the necessity for so doing is covered by our guarantee. Whenever you think a part should be free, do not wait until the end of the season, but take it up with us then, sending in to us the defective parts, charges prepaid, to be replaced, with your reasons for the request.

### **CONDENSED INSTRUCTIONS FOR ORDERING EXTRAS.**

Be sure and place your orders for extras as early each season as you possibly can. Place them either with our authorized agent in your territory, or direct with us.

Order all parts by letter, if possible giving number of part and complete description. If in the middle of the season, order by telegram, instead of telephone. We assume responsibility for shipping you what you order by letter or telegram, but not by phone.

---

## **FULL INSTRUCTIONS FOR ORDERING EXTRAS.**

Try and order what extras and repairs you will need to put your harvester in shape for the season's work as long as possible before you intend to use the machine. This will save delay in your receiving them, because just at the start of the season we have many more orders than yours to fill, and delays are unavoidable.

You will get your extras sooner after ordering if you place your orders with our authorized agent for your territory. He aims to carry a full stock of parts, and the extra time necessary to have them come from the factory will be saved to you by ordering direct from him.

If it is impossible to do this, place your order with us direct, either by letter or telegram. We will assume full responsibility for correct filling of all orders when placed in this way, but we CANNOT be responsible for mistakes made in filling orders placed over the telephone. If mistakes are made in shipment of extra parts on telephone orders, the purchaser will be charged with any additional expense in the way of transportation charges to or from the factory.

We have tried to arrange this book so that the parts for your particular machine will all be found together.

When ordering castings, be sure and give us the number which you will find on your old part. After finding this number, turn to the first list in the book if the casting is for a part of your harvester, and to the next two lists if it is for your engine, and see whether the number which you have corresponds with the description of the part to be replaced. Wherever possible, give us the number of the part, and also the description as printed in the price list.

When ordering, give us, in addition to your postoffice address, your shipping point, County and State, and designate whether the goods are to be shipped by express, freight or parcel post.

When ordering by freight, remember that the railroads have certain days on which they make less-than-carload shipments to your town, so that there may be some delay in getting the parts.

All express and freight shipments will be sent charges collect unless your receiving point has no freight or express agent, in which case we will pay the charges and add them to your bill.

On all shipments made by parcel post, the postage will be added to your charge.

We do not insure shipments unless requested. As they are all made at the purchaser's risk, it is wise to ask us to insure parcel post shipments, but when you do so, you must expect to pay the insurance charges.

When ordering parts, try and give us the size of your machine, as well as the number and name of the part. Only our castings have numbers, so, when ordering parts for Drapers, Straw Carriers, Grain Carriers, Jackson Feeders, Jackson Feeder Sticks, Separator Shoes and Screens, Cleaner Screens and Shafting, be sure to give us measurements and full descriptions.

In each shipment of repairs, we include a list showing what is included. As soon as your shipment is received, compare this list with the invoice. In case of shortage or breakage, make claim to us immediately. If this is done, it cannot be allowed.

No repair parts will be furnished for a machine that is not covered by our guarantee. We guarantee our machines until the end of the season following the year of purchase. Defective parts
